- Jquery

#### **©** Ecommerce Bagisto at Yangon

Mar 2023 - May 2023

Customizing and launching an eCommerce website using Bagisto, tailored to meet specific business needs. The project involves integrating unique features, enhancing user experience, and optimizing performance to deliver a seamless online shopping experience for customers while leveraging Bagisto's robust framework for scalability and flexibility.

 HTML, Vue, JavaScripts. Jquery, · CSS, MySQL, • Bagisto Laravel,

#### UnionSupremeCourt(API) at Yangon

Jun 2023 - Aug 2023

Developing an API-driven website for the Union Supreme Court in collaboration with an external partner. Our role involves receiving and integrating data from the partner's platform to create a seamless user experience for accessing court-related information, enhancing transparency, and facilitating efficient judicial processes within the Union Supreme Court.

 PHP, Laravel, OAuth, MySQL, RestFul API, , Security Practice,

#### RMS System of Myanmar(Website) at Yangon & Thailand

Oct 2023 - Feb 2024

Implementing a Remittance Management System for the Myanmar Ministry of Labour, facilitating migrant worker transactions between Myanmar and Thailand. Our role involves managing user data, issuing permits, and sharing information securely with partner companies and TrueMoney for seamless financial transactions. Additionally, the system includes features for verifying user data at border gates and airports to ensure compliance and streamline cross-border processes.

 HTML, JavaScripts. Django, Ajax Bootstrap. · Passport reader, · CSS, Python, Restful Api, MySQL • Singaturepad Configuration Jquery,

## RMS System of Myanmar(mobile) at Yangon & Thailand

Oct 2023 - Feb 2024

Creating a mobile app for the Myanmar Ministry of Labour to manage remittances for migrant workers between Myanmar and Thailand. The app provides features for users to display their OWIC card and CI card digitally, access their transfer history, and initiate money transfers securely using TrueMoney mobile payment services. Enhancing accessibility and efficiency for migrant workers while ensuring compliance with regulatory standards.

 KivyMd Pvthon Kivy API

## Grand Royal Group (Cap Counting System Using Al Model) at Yangon & Thailand

Oct 2023 - Feb 2024

Developing a Cap Counting System leveraging AI models powered by Roboflow and Ultralytics YOLO for object detection and classification. The system employs cutting-edge image recognition technology to accurately count and classify caps in real-time, streamlining inventory management processes and enhancing efficiency in manufacturing and warehouse environments.
